When one makes inappropriate content in Roblox-like swearing in their username or wearing inappropriate clothing they are roleplaying as an adult - the creators aren't doing anything about it. There are moderators but there should be more because some do not care about these problems or do not log on to Roblox at all times.

On January 13th, 2019, ROBLOX implemented broader anti-fraud features called "Secure Trading." The system is designed to prevent fraud such as fake accounts/bots, selling stolen virtual currency and more. It is also designed to allow users to trade in a safer environment. [28]

Spamming: Roblox has been criticized for its extreme amount of spam. Some examples include the "Free Robux" scam, where people are tricked into giving their username and password to a third party so that they can steal their Robux, and the "You Have Been Tricked" scam, which consists of the offender saying something along the lines of "DON'T TRUST. HE IS TROLLING ME."

This game has many bugs such as glitching which can happen at any time including in games. There is no way to report this glitch due to the fact that the button isn't there and you can only report it from the website. This is extremely annoying because you need to refresh the page and play all over again, but this usually happens when you are about to win.

Media usage and privacy concerns from various sources (see articles) have prompted user action against the company. ROBLOX is a site that allows its users to create their own 3D worlds by building them with the Roblox Studio software. Users can also import their own model and use it in their game. Users can also upload their game and give it ratings on ROBLOX's website. ROBLOX has also allowed users to create art of other games from other developers on YouTube through ROBLOX's brand of accounts created for this purpose. However, they have been criticized for not allowing users to upload custom art they have created into their games, which is done by making custom "Avatar" models for users which can then be used in-game.
